RE: Removal of material and tanks at C&D Recycling.

Enclosed is a copy of a document given to Hart Environmental by M. W. Farmer relating to the movement of material from C & D Recycling to Clinton County Solid Waste Wayne Township landfill. Although the source of the oil is not indicated Bill Neubeck tells me the amount corresponds with observation's made by David J. Casey, their staff engineer at the site. The date is also consistent with the date of removal from the site, 8-9-88 as determined from the field notes. Bill also called Loretta Brungard at the Clinton Co. Solid Waste Authority who said the landfilling of oil is permitted and PADER approved. Also enclosed is certification from M.H. Brenner's Scrap Yard of the receipt of three tanks and a 55 gallon drum, and a certificate of decommissioning and cleaning by M.W. Farmer.

Sincerely,

J. T. Chikowski  
Sr. Engineer

CERTIFICATE OF NON-HAZARDOUS VESSEL

I, Clifford C. Harmon, as a representative of M. W. Farmer and Company, state that the tanks excavated, decommissioned and cleaned at the C & D Recycling Site in Freeland, Pennsylvania are non-hazardous vessels due to the following:

- All vapors have been purged from the tanks (as confirmed by explosimeter readings);
- the tanks have been rendered useless by cutting large holes in each end; and
- the tanks have been cleaned of all contents by scrubbing and steam-cleaning, and all contents and rinse water have been disposed of properly (permits and transportation documents are available on request).

These tanks are ready for transport and disposal as scrap metal and are presently stored at the C & D Recycling site.

RECEIPT OF NON-HAZARDOUS VESSELS

This certifies that M. H. Brenner's Scrap Yard in Hazelton, PA received non-hazardous vessels from the C & D Recycling site. The vessels are described as follows:

1 10,000 GALLON TANK  
1 500 GALLON TANK  
1 150 GALLON TANK  
1 55 GALLON DRUM

These tanks will be used as scrap metal only.
